

1. First uninstall the license server. Click on Finder then navigate to Applications --> ChaosGroup --> VRLService --> OLS --> uninstall. Doubleclick the Uninstall icon enter your user's password if required and follow the instructions of the uninstall wizard.

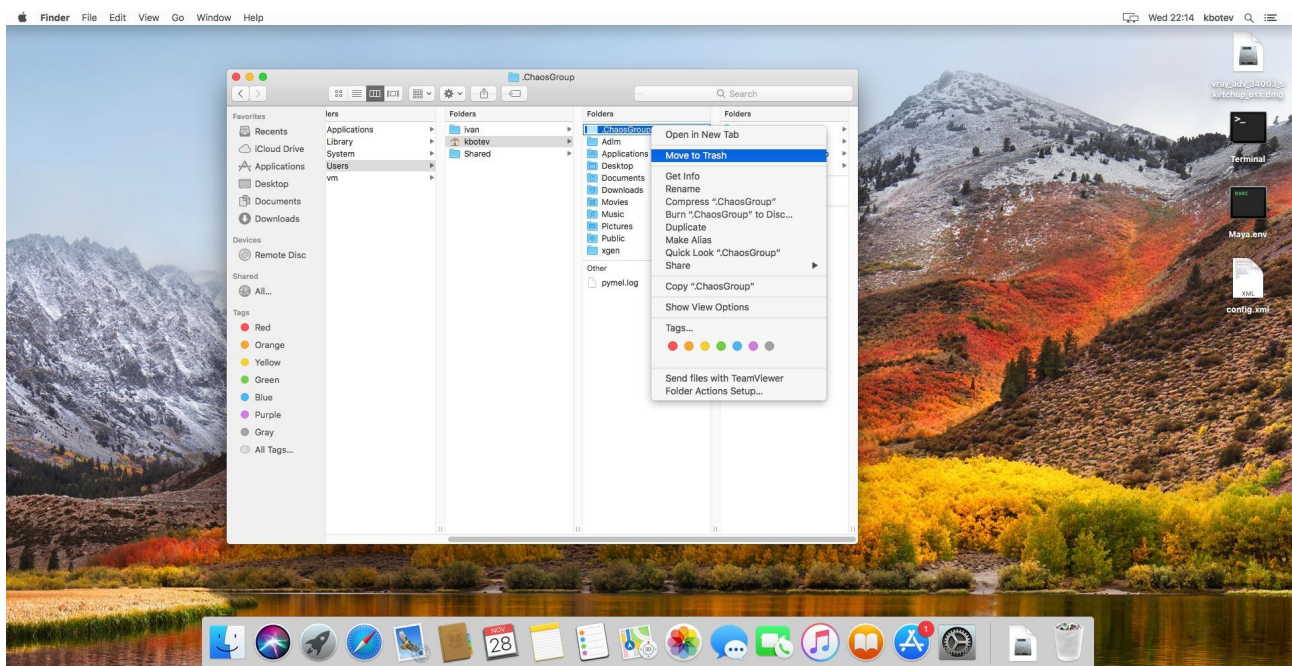

2. When the uninstall of the license server is complete click on Finder again then on the drop down menu Go --> Go to Folder.

3. A popup window will appear type /Users/YOURUSERNAMEHERE/.ChaosGroup inside and press the Go button.

4. After that just right click on the .ChaosGroup folder and select Move to Trash.

5. Now login to our website and download the latest version of the license server from the link below:

<https://download.chaosgroup.com/?platform=47&product=48>

You can see the installation instructions here:

<https://docs.chaosgroup.com/display/LIC5/Installing+the+License+Server>

6. When the installation is finished open in your web browser "localhost:30304" and click on Enable Online licensing then login with your username. After that you should see your licenses listed on the page and be able to use V-Ray.
